

# Welcome to Kamala Niketan School

Nestled in the heart of Trichy, Kamala Niketan Montessori School began as Tiny Tots in 1991 and has grown into a leading institution offering education from primary to senior secondary levels. As the first to introduce Montessori education to Trichy 30 years ago, we continue to set benchmarks in academic excellence and innovation.

Guided by visionary leaders, Mrs. Geethanjali and Mr. Sathiamoorthy, we have pioneered numerous advancements, including this year's launch of Tamil Nadu's first cutting-edge AI lab. With a history of NEET and IIT achievers and a vibrant alumni network, we remain committed to producing technologically advanced, emotionally intelligent, and socially conscious individuals.

At Kamala Niketan, we blend tradition with innovation, shaping well-rounded individuals prepared for the future.

**1991**  
Journey began with  
5 students

Candidate school  
of IB PYP

**2020**  
Implementation of  
blended learning

## Vision

KNMS will strive to be seen as a premier school of education through high quality content, an innovative approach to learning, and usage of technology. Our endeavour will be to create academically strong, well-rounded, compassionate and responsible global citizens.

# Nurturing Young Minds

## Key Features of Our Program

### Prepared Environment

Our carefully crafted classrooms empower children to explore, discover, and grow in a safe setting.

### Teacher as a Guide

Trained teachers act as guides, providing personalized support based on each child's unique needs.

"The greatest gifts we can give our children are the roots of responsibility and the wings of independence."

— **Maria Montessori**

### Intrinsic Motivation

We aim to inspire a love for learning that comes from within. In our Montessori classrooms, children explore topics out of genuine interest and curiosity.

### Whole Child Development

Beyond academics, we focus on building emotional resilience, social skills, and confidence. Our goal is for each child to feel valued, compassionate, and prepared to face life with integrity and kindness.

### Child-Centered Learning

Our Montessori program fosters independence by allowing each child to learn at their own pace, with individualized teacher touch points tailored to their unique interests and developmental stage.

### Multi-Age Classrooms

In our mixed-age classrooms (typically spanning 3 age groups), children learn from one another, building leadership and collaboration skills.

### Freedom Within Limits

Our classrooms give children the freedom to choose activities that interest them and work at their own pace. This freedom, within a framework of respectful boundaries, teaches them responsibility, self-discipline, and respect for others.

### Hands-On Learning Materials

Our classrooms are filled with hands-on materials that let children experience concepts in a concrete way. Our classrooms are equipped with materials that encompass the entire curriculum and are reviewed periodically to stay relevant and current.

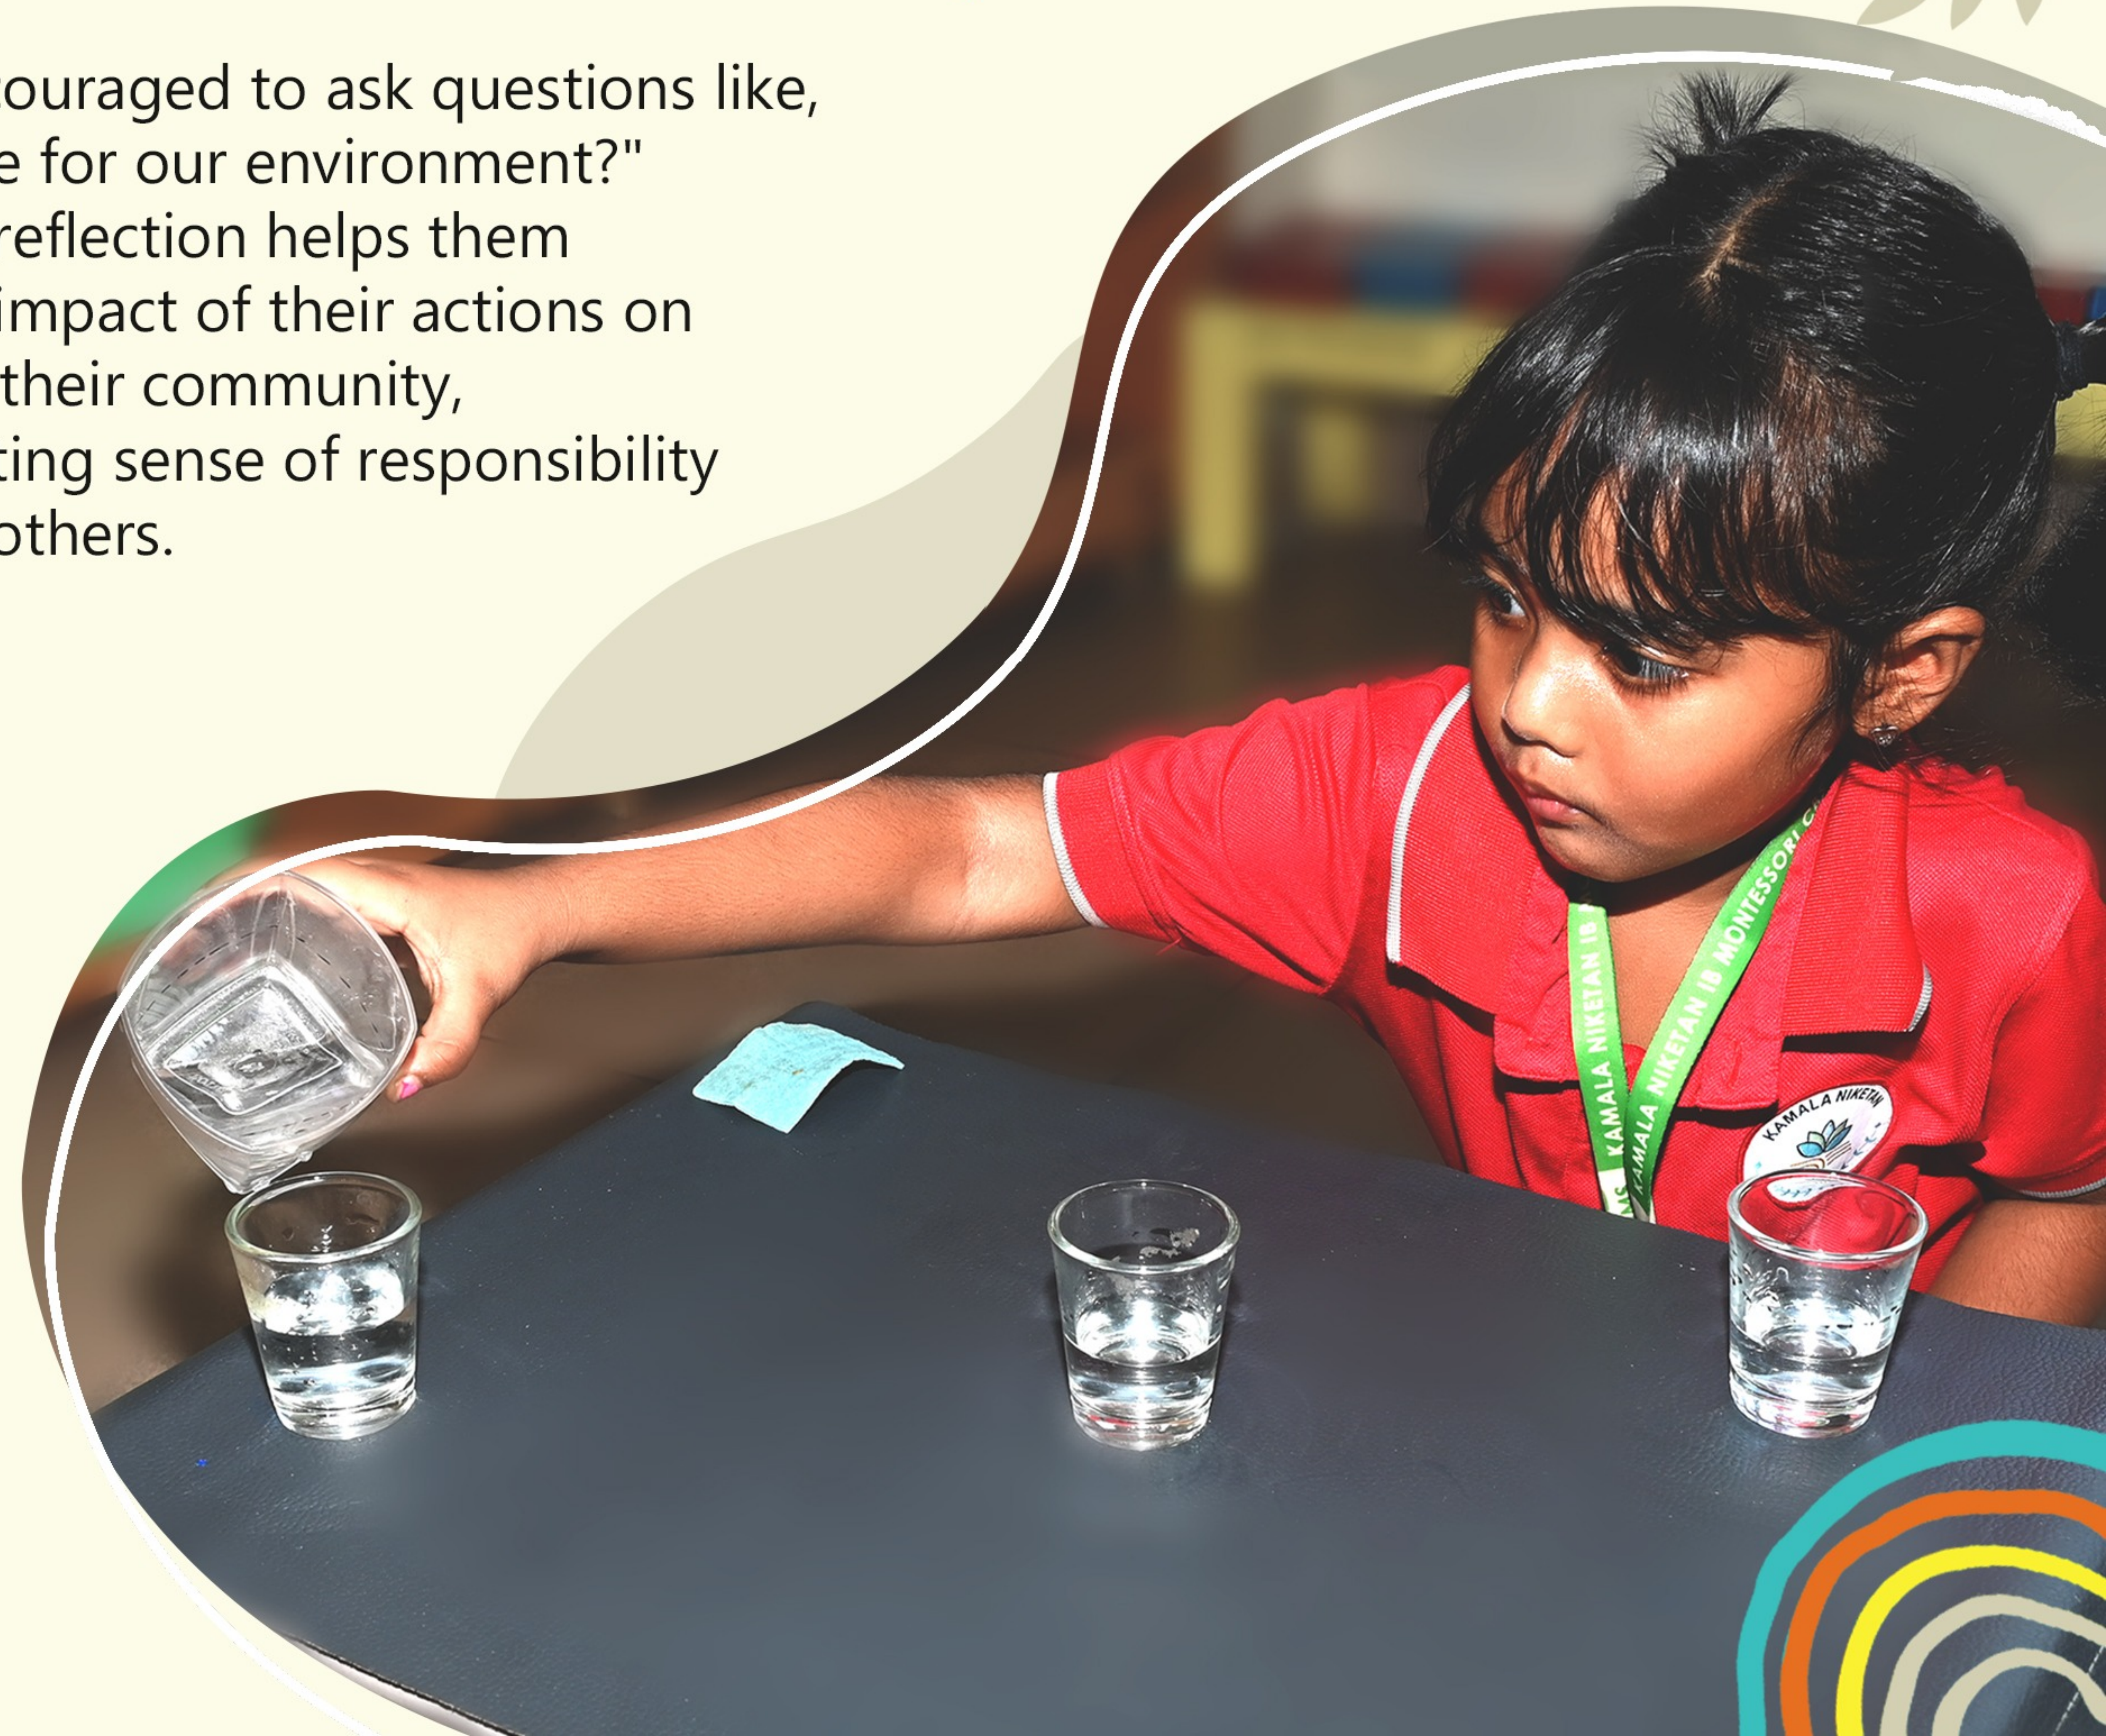

# Practical Life skills

*Fostering Independence and Responsibility*

At the heart of the Montessori experience, Practical Life is designed to nurture daily living skills that foster independence, concentration, and a sense of responsibility. Children engage in activities such as dressing, food preparation, environmental care, and practicing social etiquette each rooted in real-world tasks that build coordination and self-discipline.

Children are encouraged to ask questions like, "How do we care for our environment?" This thoughtful reflection helps them understand the impact of their actions on themselves and their community, promoting a lasting sense of responsibility and respect for others.

# Sensorial

## *Refining Perception and Observation*

The Sensorial Area invites children to investigate and distinguish the world through their senses. Here, materials include a variety of shapes, colors, textures, sounds, and tastes, allowing children to explore and differentiate sensory experiences.

The Sensorial Area invites children to investigate and distinguish the world through their senses. Here, materials include a variety of shapes, colors, textures, sounds, and tastes, allowing children to explore and differentiate sensory experiences.

# Mathematics

## *Building Numeracy and Analytical Skills*

Montessori Math materials provide a hands-on approach to abstract concepts. Students engage with materials that introduce counting, operations, geometry, and measurements, allowing for a concrete understanding of mathematical principles.

This is enhanced with real world exploration of concepts like , "How can we measure things in our environment?" or "What patterns do we see in numbers?" This fosters critical thinking as they engage with mathematical concepts in a meaningful context.

# Language

*Inspiring a Love for Communication and Reading*

In the Language Area, children blossom as readers and writers through rich, interactive experiences that nurture a love for literacy and communication. Activities such as storytelling, singing, and open discussions provide a joyful space where they confidently express themselves.

Our learners explore stories, express their ideas, and connect with diverse perspectives. They ask reflective questions like, "How would I feel if I were a character in this story?" and "What questions can I ask to learn more?" placing curiosity driven learning at the heart of their growth.

# Cultural Studies

*Expanding Horizons and Cultivating Curiosity*

The Cultural Studies Area serves as a platform for exploring global diversity and interconnectedness. Children delve into geography, history, ecosystems, and world cultures, engaging with questions like, "How do different cultures celebrate traditions?"

Through meaningful experiences, such as visits to each other's homes, they practice appreciation and respect for diverse customs. This approach fosters a sense of interconnectedness, and a well-rounded global perspective rooted in an appreciation of their own community and local traditions.

# Science

*Exploring the Wonders of Nature and Science*

Exploration sparks curiosity and nurtures a love for discovering the world around us. Through hands-on activities and simple experiments, children explore the wonders of plants, animals, weather, and how things work.

They might ask questions like, "How do ants work together?" or "Why do leaves have different shapes?" These joyful explorations inspire wonder and help children see the beauty and diversity of the world around them.

# Art and Music

## *Imagination and Emotional Growth*

Singing and music fill our days with joy, connecting everyone and making each moment feel special. Every creation is celebrated, helping children feel valued and inspired to keep creating.

Creative Expression is woven into each day, where every activity becomes a canvas for children to explore through drawing, coloring, shaping clay, and building-bringing their ideas to life.

# Enrichment Programs

## *Health and Well-being*

**At Kamala Niketan, children engage in free play, gardening, and reading programs, fostering creativity, connection, and lifelong skills:**

### **Free Play -**

Encourages exploration, movement, and active play with peers, promoting physical skills, social interaction, creativity, problem-solving, and resilience.

### **Gardening -**

Cultivates a love for nature through hands-on activity, teaching patience, responsibility, and appreciation for the natural world.

# Enrichment Programs

## *Health and Well-being*

### **Reading program -**

Nurtures a lifelong love of reading and cultural awareness while providing opportunities for bonding, sharing, and expanding children's understanding of the world.

### **Art Exploration -**

Fosters self-expression, creativity, and fine motor skills while encouraging emotional growth and an appreciation for aesthetics.

At later stages, these activities evolve into more structured programs like music, sports, dance, and yoga, fostering discipline, teamwork, creativity, and physical well-being.

## Facilities and Learning Environment

Our Montessori school is a thoughtfully prepared environment where each classroom empowers children to explore, learn, and grow independently with hands-on materials.

## Community building

At Kamala Niketan, we believe that children thrive when parents and teachers work together, building a supportive and joyful community. Through regular parent-teacher meetings, weekly walk-ins, and shared updates on social media, we ensure parents stay connected and involved.

Whether celebrating birthdays, visiting children's homes, or leading story sessions, we cherish these joyful moments where families connect and lasting memories are made, knowing that when we grow as a community, our children grow with us.

# Testimonials

**Mrs. Revathi**

Parent of  
Pre Primary Year 2

I wanted to thank the staff and everyone in this organization who curated the curriculum and trained the staff.

As a first-time parent, I was skeptical of how my kid would learn phonics and write it in words, though I have heard parents tell me that KNMS makes it doable. Nihaarika has been sick and has not attended school for the past two days. Yesterday night, she randomly scribbled on the wall and made some phonics sounds.

What we suddenly found was, she was writing cat on the wall. Though the letters are not written correctly, this is her first time writing a word and we were thrilled to see this. I was thrilled that school had become her happy place, and now we're even more delighted to see her absorbing and embracing the lessons offered.

**Mrs. Jegalakshmi Princy**

Parent of  
Pre Primary Year 3

The learning environment at Kamala Niketan is truly unique. Watching my child thrive through hands-on activities and guided exploration has been a rewarding experience. The dedicated teachers and the emphasis on respect and empathy are what make this place special.

# Admissions information

## How to Apply for Admissions?

- Visit Our school office
- Fill Out the Registration form
- Pay Application Fee and collect the Application Form
- Submit the application form with specific enclosures
- Prepare for Assessment/Interview

## Important dates -

- Admission for PreKG and LKG - December
- School start date - June 2025
